

The OPC COVID-19 Quality Improvement and Research Platform for primary care has been developed to provide quality improvement support to practices and reduce their workload.

The COVID-19 Quality Improvement Programme will help GP practices identify patients affected by COVID-19 through patient questionnaires combined with patient electronic health records (EHR).

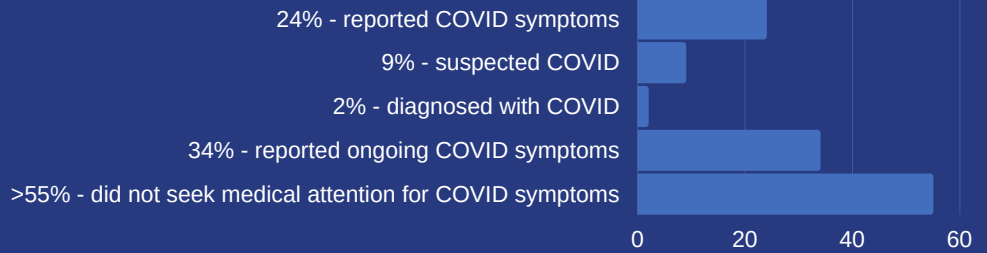

DEMOGRAPHICS

SYMPTOMS AND TESTING

Early data shows that practices are unaware of many Covid test results

One third of patients are reporting Long Covid symptoms

VULNERABILITY
